**WHO WE ARE**

A construction company Seeking to be a global leader in the integrated construction services.

We are a company planing To Become The Customers' Most Preferred Choice By consistently delivering high-quality, value-added projects on schedule. To provide the best level of service in the construction business while delivering exceptional craftsmanship on every project we manage. To foster a safety culture with the goal of continuously lowering the frequency of service incidents in order to achieve zero accidents

# OUR VISION:

To become the top construction firm, delivering projects that constantly meet worldwide standards and provide outstanding customer service. To consistently provide outstanding value and innovative construction solutions to fulfill our clients' needs. Using current concepts and sophisticated technology, AMFU envisions being the first choice both nationally and globally for their known excellence, quality, performance, and dependability in all types of structures.

# OUR MISSION:

To be a global leader in the building industry. To Become The Customers' Most Preferred Choice By consistently delivering high-quality, value-added projects on schedule. To provide the best level of service in the construction business while delivering exceptional craftsmanship on every project we manage. To continuously innovate, develop, and use cutting-edge technology in procedures and materials to increase productivity and cost effectiveness. To continuously increase our team's competency and to hire diverse, inventive, and results-oriented individuals who are driven to produce greatness. To foster a safety culture with the goal of continuously lowering the frequency of service incidents in order to achieve zero accidents. To identify and reduce all environmental impacts associated with our activities, as well as to comply with applicable environmental standards.

# OUR VALUES:

Our core values represents who we are and provide, without question , the standard of behaviour by which we conduct business. These values are the heart , soul, and character of EICC. Our code embodies the vision of our company founders and encompasses the values that have been and will continue to be vital to the future success of the company . our core value represent how we retreat each other , how we deal with our clients. How we respond to our stakeholders, and how we hold each other and ourselves accountable . this is the legacy we will leave for generations to come

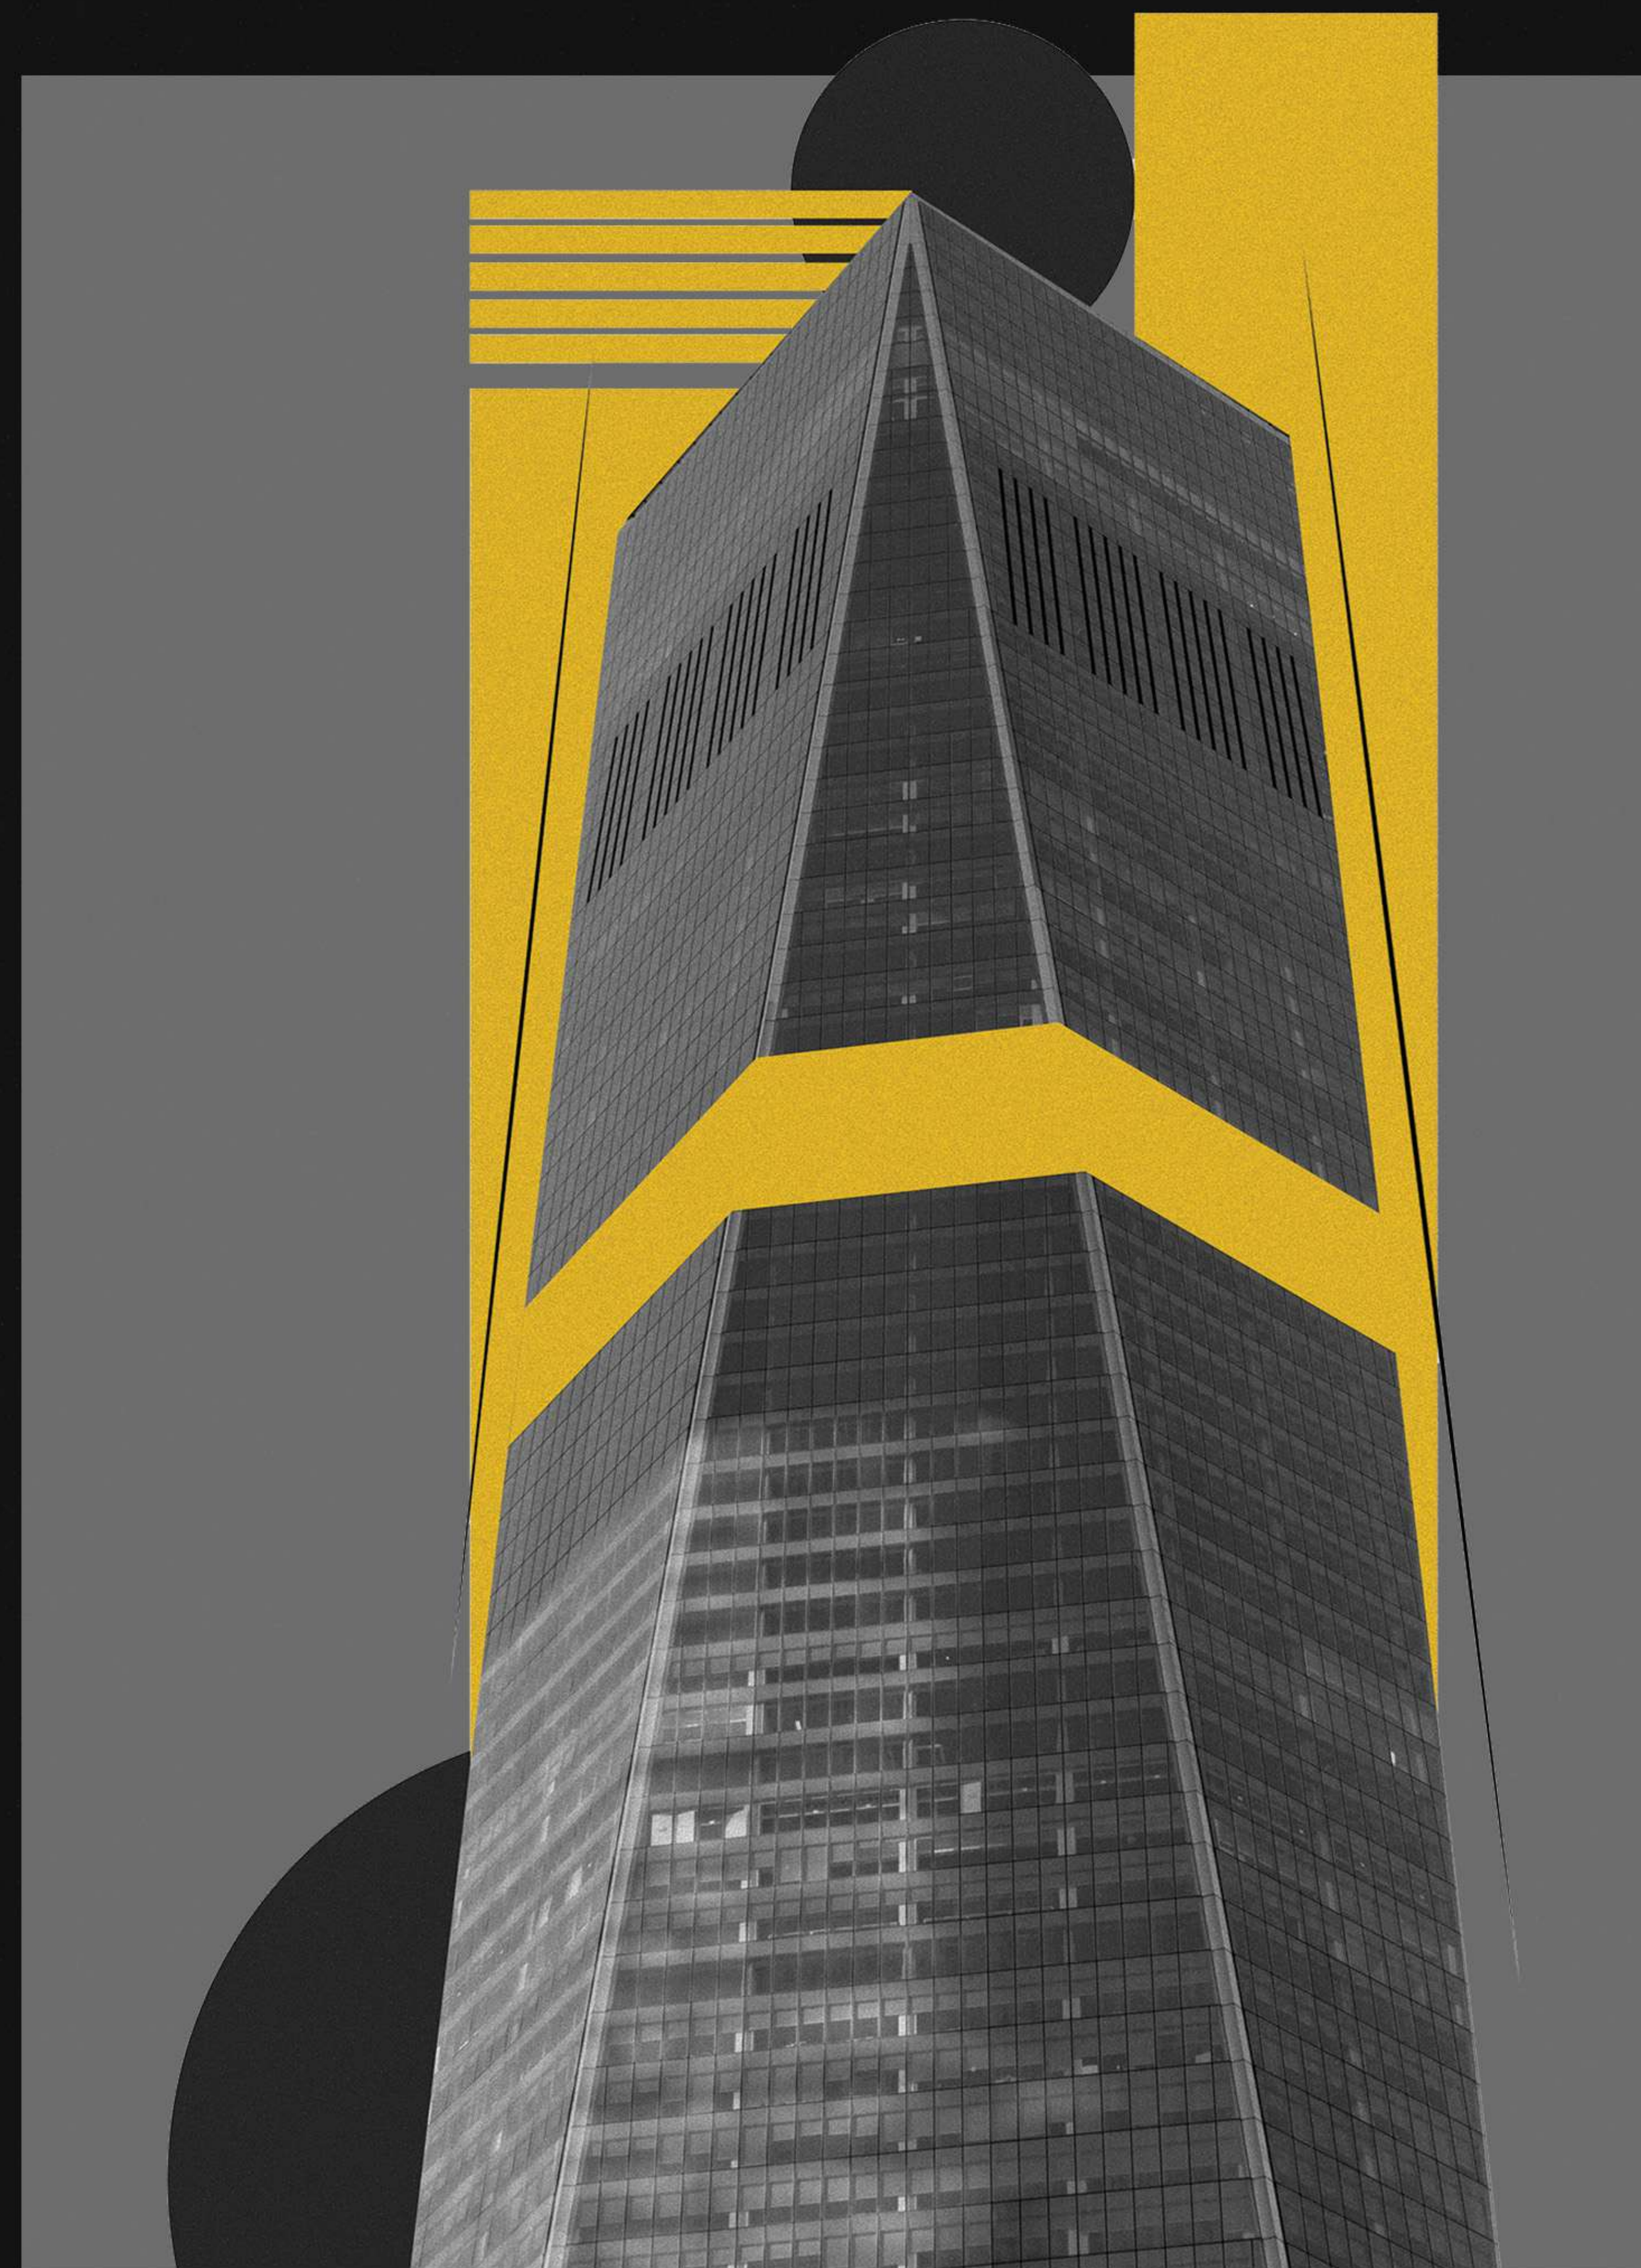

The following eight ethical core values represent the cornerstone of our code of conduct . while achieving these high standards may be difficult to attain , we nonetheless aspire to live our lives and conduct our business with:

- 1.honesty
- 2.integrity
- 3.fairness
- 4.Accountability
- 5.consederation for others
- 6.pursuit of excellence
- 7.Reliabilty
- 8.Citizenship

# OUR STRATEGY:

We are committed to differentiating ourselves by continuously increasing our expertise in executing oil and gas facilities, earth work, road works, and infrastructure projects, while maintaining a highly selective risk management process for each new project and venture. AMFU will always operate at the highest level of safety, quality, and cost effectiveness to ensure we remain the most appealing to our clients, employees, and partners. Our success is due to our people, who try to be inventive, adapt to local markets, and polish their talents. AMFU will continue to grow and boost profitability through this strategy, which focuses on risk management, teamwork, safety, and quality.

# OUR GOALS:

To become a world-class integrated multinational EPCM, Technologies, and Energy company. Our mission is to create a brighter future by developing and utilizing EPCM and technology to contribute to economic and social progress. To achieve sustainable growth, utilize both intangible and tangible assets, digital and traditional technology, and establish a strong value chain.

Create effective production systems by integrating manufacturing processes into building sites and visualizing the full supply chain.
